by Humanscale

NEXT GENERATION ONLINE ERGONOMICS SELF-ASSESSMENT

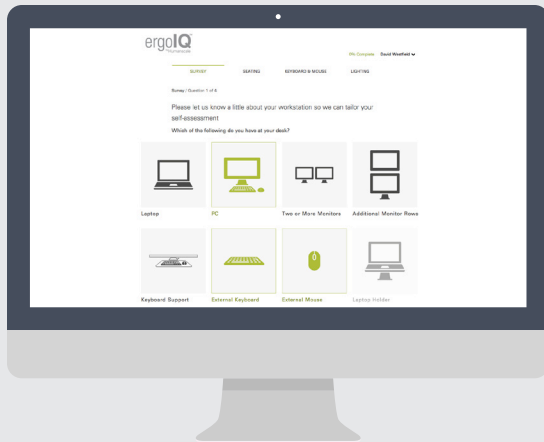

**Developed by board certified professional ergonomists,** ergoIQ FIT empowers employees to quickly configure computer workstations for optimal health and comfort.

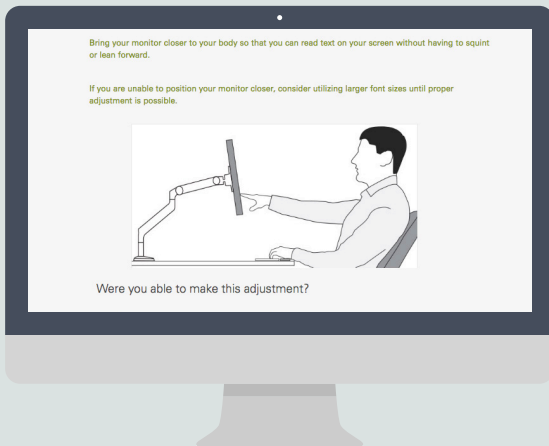

**Intuitive, scalable, and cost-effective, ergoIQ FIT is the next generation of online ergonomics web application.**

Humanscale<sup>®</sup>

SELF-ASSESSMENT

- Each self-assessment is customized based on the user’s existing workstation set-up
- Designed to configure complex multiple monitor and sit/stand environments

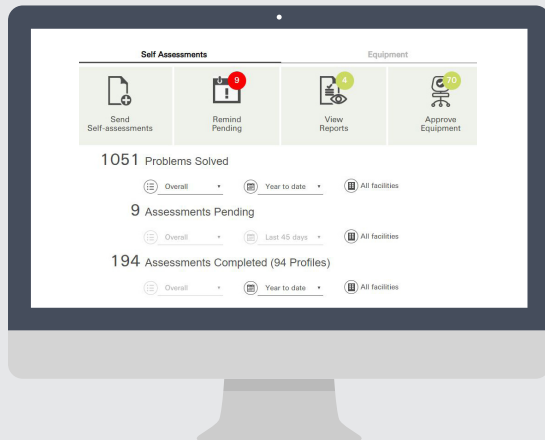

- Intuitive modern interface illustrates each adjustment and ergonomics guideline
- Educates users on the rationale for each recommendation

- Unique scoring system gauges overall fit pre and post assessment
- Users are able to request a more formal ergonomic assessment of their workstation
- Time efficient process; the average completion time is under 10 minutes

**PROGRAM MANAGEMENT**

- Streamlines the ergonomic assessment process by automating equipment approvals and simplifying equipment procurement
- Enables the uploading of your current approved equipment standards and vendor list
- Recommendations can be grouped by vendor, saving hours of tedious administrative work

**DATA ANALYSIS**

- Tracks aggregate fit scores, self-assessment utilization, equipment recommendations and overall improvement levels
- Instantly inspect data across multiple facilities with user defined date ranges

**Why ergoIQ FIT?**

**UNPARALLELED EASE-OF-USE:**

Modern intuitive user interface requires no training

**WEB BASED APPLICATION:**

No need to download or install software

**ADAPTABLE:**

Easily modify facilities, equipment specifications and approval workflow

**COST-EFFECTIVE:**

Reduces costs up to 90% over traditional on-site assessment programs
